From its state of the art laboratory complex and headquarters based in Saffron Walden, near Cambridge, highly qualified technical experts and a multi-lingual sales and marketing team support an ever-increasing number of customers worldwide, providing them with technically advanced materials.

Today, Contamac manufactures more than 100 high performance materials that fulfill the requirement for products in the Contact Lens and Intra ocular Lens markets. A total commitment to innovation, education and high standards has helped secure its prominent position in the market and drives the company's passion to develop and bring new technology to the Ophthalmic Industry.

Products

"Becoming the Standard of Care"

Contamac is acknowledged as the world leader in contact lens and intra ocular lens material technology offering the most comprehensive and finest quality materials that have been developed on an excellent reputation for innovation, technical support and customer service.

Product range includes:

Optimum, Definitive, F2, GM Advance, GM3, Contaflex, CI26, CI26Y, PMMA.

Materials to suit any application:

Indications: Myopia, Hyperopia, Irregular corneas, Keratoconus, PMD, Post Refractive Surgery, Cataract Surgery, Overnight wear.

Quality

"A reputation we are proud of"

Contamac continually strives to improve and excel in all activities, to address every aspect of personnel, commercial and technical development, and never assumes that a position has been reached beyond which there can be no improvement.

The company's accreditations to ISO9001/2008, ISO13485:2003 and 510K pre market clearance for 14 Contact Lens and Intra Ocular Lens materials demonstrates Contamac's commitment to quality.

Centre Of Excellence

"Four divisions sharing one vision... for excellence"

Professional Services

Contamac's professional services team outreaches to professional associations and supports our customers' activities in providing advanced, technical contact lens information and industry trends to ensure the most updated information is presented.

Contamac's in-house state of the art Practitioner Educational Clinic is used to offer a wide range of educational support such as:

- Customized education and workshops in partnership with our customers
- Education on a wide range of clinical indications and best practice in managing these
- CET education direct to the eye care practitioner
- New technologies, including material (chemistry) advancements

Contamac Specialty Lens Institute™

Contamac Specialty Lens Institute™ (CSLI) is dedicated to serving students, residents, practitioners, patients and communities on a global basis in specialty contact lens education, clinical care, research and leadership.

Research & Development

Contamac are considered as the company that is researching and developing new products to support it's customers and the specialist lens industry.

The Research and Development function is at the core of Contamac's activities. Like all forward thinking companies, we recognise the importance of significant investment in the development of new products.

Contact Lens Analysis & Testing

Contamac offers a contact lens analysis service for finished products covering a wide range of material properties and characteristics.
