Professional Services

Contamac provides industry leading education to its customers and professional associations on a global basis.

Contamac's in-house state of the art Practitioner Educational Clinic also offers many opportunities for a wide range of educational support, such as:

- Customized education in partnership with our customers
- Workshop education in partnership with our customers
- Education on a wide range of clinical indications and best practice
- CET education direct to eye care practitioners
- New technologies, including material (chemistry) advancements

Contamac Specialty Lens Institute™

CONTAMAC SpecialtyLensInstitute

Contamac Specialty Lens Institute™ (CSLI) collaborates with all academic institutions, educating eye care

practitioners and

professional organizations,

providing specialty lens

specific lectures,

workshops,

newsletters,

scholarships,

practitioner and research

updates, and unique case histories. The CSLI

expands the students' clinical exposure to

specialty contact lens patients, knowledge of

new materials, relationships with laboratories

and practice opportunities.

Research & Development

Contamac's Polymer Research and Development Department focus on the continuous generation of new and improved products for the ophthalmic industry. Working with customers and closely monitoring our industry, we are able to develop products that meet ever changing and challenging requirements.

Our team of highly skilled chemists concentrate on delivering complex and leading edge technology materials designed to ultimately enhance quality of life by providing improved vision.

Contact Lens Analysis & Testing

Contamac offers a contact lens analysis service for finished products covering a wide range of material properties and characteristics.

Analytical Techniques:

- Gas chromatography
- UV spectrophotometry
- Contact angle measurement
- Extractable determination
- Residual monomer content

Physical Techniques:

- Modulus
- Oxygen permeability
- Refractive index
- Water content
- Specific gravity

Contact Lens Characteristics:

- Lens parameter determination
- Care solution compatibility studies
- Shelf life
